

Personal details

To whom it may concern,

I am a highly motivated person with broad range of transferable skills and experiences and a proven record of achieving targets and goals. I've lived in Dubai for 2 years and I have a very strong background in IT, marketing and interpersonal interaction.

I have many years of experience in designing content for digital signage, Flash and HTML web sites, personal and company presentations, flyers, letterheads, business cards and more.

With addition of my strong organizational skills and a proven ability to manage and motivate I believe that I could make a significant and valuable contribution to your company.

I would appreciate the opportunity to prove how my education and experience will be helpful to you.

Samples of my work are available on my web site. Thank you for your time and consideration.

Looking forward to hear from you,
Sincerely,

Ivan Isakovic

 Creating Illustrations

Skills

Computer skills: I have very strong background in IT and equally strong computer skills.

Some of the programs and computer skills I have used on regular basis:

Adobe Photoshop

Worked on Photoshop since version 3
Photoshop is my primary tool. Using for design, illustration, photo manipulation, pixel art, and many other purposes. I use pen tablet mostly for illustrating and cutting difficult images.

Adobe Flash

I use Adobe Flash for design, animation and vector illustrations. I can create banners, animations, complete functional web sites, offline personal/company presentations and much more.

Digital Signage

Worked on Cool Sign and Cayin Web+
I am trained to use Cool Sign and Cayin digital signage software. I also gave training in basic use of Cool Sign. Used in **Toys 'R' Us**, **Intersport**, **Sony/Jumbo** stand at **Gitex** exhibition.

Adobe After Effects

When creating content for digital signage or offline presentations, Adobe After Effects is almost invaluable tool.

Corel Draw

I use Corel for creating logos in vector graphic, when I prepare content for print and when ever I need to create precise vector graphics. This CV is made in Corel Draw with header in vectors.

HTML/CSS

Knowledge of HTML/CSS is a must for any web designer. I am skilled in creating the content using HTML combined with CSS. With this skill I can create online/offline presentations, complete web sites or HTML templates for Cayin system.

Other

I have experience in Windows and PC surroundings mostly. Beside above mentioned, I work in lot of other programs that can help me reach my goal. I am also very fast in searching the web for scripts and photos.

Education: School of Graphical Arts

Personal interests: I have a great interest in art, design and technology. I love to draw and paint, and I do that often. I enjoy photography, Rock'n'Roll music and socializing with friends.
